

TERRACYCLE SCHEMES – UPDATED JULY 2023

STAMP RECYCLING ON BEHALF OF KICKS COUNT

SORTING AND TRIMMING GUIDELINES

STAGE 1 - SORTING THE STAMPS

To ensure Kicks Count receive the biggest financial benefit we need the stamps we collect to be sorted into 3 categories:

- 1 - Foreign stamps
- 2 - Modern UK stamps (post 2006)
- 3 - Old UK stamps (pre 2006)

1. Foreign Stamps

These are the easy ones as there are no special rules to consider! Stamps from UK territories (Jersey, Guernsey and Isle of Man) go into the foreign stamps category.

Foreign stamps do not require any sorting according to their age or country.

2. Modern UK stamps - post 2006

These stamps are identified through the presence of an oval security cut-out. This is only applicable to standard issue regular stamps e.g. 1st, 2nd or make-up value stamps (1p, 10p, £1).

All picture and commemorative stamps are also included in this category, unless you are able to identify the stamp as being 'old' and therefore they would be included in third category 'old UK stamps'.

3. Old UK stamps (pre 2006)

These are any standard issue stamps that do not have the oval security cut-out's. It sounds difficult to identify these stamps, but without even looking for the oval security cut out you will notice a difference in the colour and design of the stamp and after you have seen a few will be able to spot them easily.

TERRACYCLE SCHEMES – UPDATED JULY 2023

Note: Unlike previously, we are now able to accept stamps that have been crossed through with pen ('pen-cancels').

Stamps that have been missed by the Royal Mail franking machine can be accepted. Please be aware that it is illegal to re-use these stamps and it would be considered an act of fraud.

Stamps we are unable to accept

- Any damaged stamps - the stamp itself, as well as the stamp perforations have to be completely intact
- Paper stamps - stamps that have been printed onto paper and are not an actual stick on stamp
- Parcel stamps - these are the gold/white printed square labels used on parcels
- Letter postage paid (self-inking stamps)

STAGE 2 - TRIMMING THE STAMPS

The excess paper from around the stamp needs to be trimmed, leaving no more than a 1cm border, or one fingers width. A border of less than 1cm is acceptable, providing the stamp itself and its perforations haven't been damaged at all.

Please ensure the back of the envelope is removed (e.g. there is no double paper).

Stamps with no backing paper at all can still be accepted.

Please do not trim any first day issue/first day cover or commemorative/presentation pack stamps, as these will hold more value in their original format.
